

**PRICE RIVER DISTRIBUTION SYSTEM  
1997 NOTES**

**FEBRUARY 26, 1997   ANNUAL MEETING**

Mark requested that we make accounts 21A,B, &C inactive. The diversion associated with these accounts is at the bottom of the system. The commissioner provides no regulation of the diversion and only estimates the deliveries because of poor measuring devices. The water users are not working much with us to improve the situation.

Commissioners report - work on Scofield Reservoir is complete. Last year, it peaked on June 16 at 43,960 AF and was at its low on October 10 at 16,149 AF. Current content is 23,369 AF; last year at this time it held 31,554 AF. The capacity of the reservoir is 64,000 AF and the projected runoff is 75,000 by July 1. They have started reservoir releases which are now at 75 cfs but will be increasing to 100cfs. They want to avoid the possibility of the peak on White River coinciding with a spill from Scofield Reservoir.

**MARCH 19, 1997   LETTER TO BOB DAVIS**

Dear Bob:

As you are aware, at the distribution system annual meeting, the water users decided to drop the funding for your son's health insurance. I checked today and found out that people can be dropped from the insurance coverage at any time. I was mistaken when I told you after the meeting that I thought he could not be dropped until June 30th.

To take your son off the insurance coverage, you need to fill out the enclosed change card and return it to Patsy Baggs in our office. She will then get the change processed.

I you have any questions, you can call Patsy at 538-7424 or me at 538-7380.

Sincerely,

Lee H. Sim, P.E.  
Assistant State Engineer  
for Adjudication and Distribution
